

Better for Your Bottom Line

THE PROPANE FARM INCENTIVE PROGRAM

You know that no matter the size of your operation, propane is the energy that's better for your bottom line – from increased equipment efficiency to decreased fuel costs. Now, consider what other applications can help you harness the benefits of propane, and you can receive payouts of up to \$5,000 per application, thanks to the Propane Farm Incentive Program.

The Propane Farm Incentive Program offers payouts to producers like you for documenting propane's performance on the farm. By supplying this real-world data, you are helping to improve the future of agricultural operations in ways that make them even more efficient, more cost-effective, and more environmentally friendly. Plus, applying for incentive dollars is simple – and an easy way to benefit your bottom line.

The Benefits of Propane Are Many – and Growing

EFFICIENT

From building heat to irrigation, propane equipment is built for greater efficiency, with applications that can serve almost any activity on the farm. And because propane isn't impacted by interruptions to the electrical grid, you'll be ready for whatever the season brings.

AFFORDABLE

Propane can lower fuel costs for nearly any application found on the farm, and when compared to diesel, propane can reduce fuel costs by up to 45%. Reliable, hard-working propane does more than help improve your yields – it saves you money.

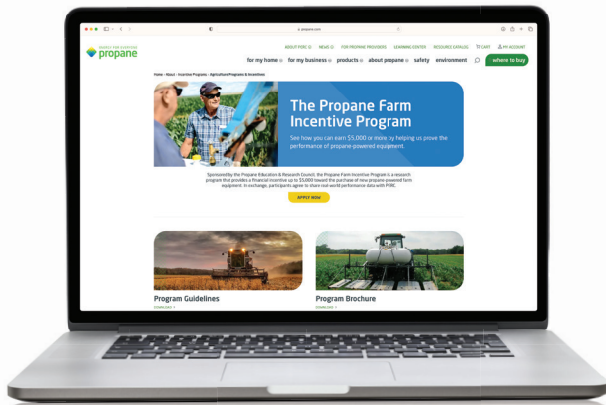

ENVIRONMENTALLY FRIENDLY

As an approved alternative fuel under the Clean Air Act, propane helps farms significantly lower emissions. Propane produces 43% fewer greenhouse gas emissions from farms when compared to grid electricity.

Simple Steps to a Better Bottom Line

HOW TO APPLY FOR THE PROPANE FARM INCENTIVE PROGRAM

- 1 Visit **propane.com/farmincentive** and click "Apply Now" to determine your eligibility.
- 2 After logging in (or creating a new account), complete the brief demographic survey about your operation.
- 3 Select "Add Equipment" and answer the required questions. Follow the on-screen instructions for uploading your receipt or paid invoice and W-9 and then sign the program contract electronically.
- 4 Once successfully submitted, PERC will review and process your application before sending your payouts. Incentive checks will be distributed within 60 days or less after application completion.

To qualify for the Propane Farm Incentive Program, producers must purchase eligible propane-powered equipment while meeting the following criteria:

- Represent a farm or agribusiness and be at least 18 years of age.
- Provide an appropriate tax identification number or social security number unique to the farm operation receiving the incentive.
- Must use equipment on a U.S. farm as defined by the U.S. Department of Agriculture, in direct support of agricultural production. If not on a farm, equipment must be used in support of an agribusiness dedicated to the primary processing of any agricultural, horticultural, or animal commodity.
- Be a propane customer in good standing with your fuel supplier.

What Producers and Participants Say About The Propane Farm Incentive Program

"We had some older diesel irrigation motors that were in need of replacement. This incentive program came along and it made economic sense to go with propane over diesel."

THOMAS UHLMAN
Producer

"When you look at what propane offers and when you look at what the incentive program offers, it really pencils out to be in the benefit of the farmer."

PETE STOUT
Product Manager, Origin Engines

"Propane is way ahead of its time in terms of clean burning. It's been a good program for us."

GLENN CHVATAL
Producer
